

Capability Statement

DU-LITE CORPORATION

Company:

Du-Lite Corporation is a Connecticut based small business founded in 1939; the corporate office is located in Middletown, CT. Du-Lite Corporation has been a leading supplier of black oxide (bluing), and manganese phosphate (parkerizing) finishes for firearms which prevents rusting and enhances their appearance. An important part of our success has been the technical support we provide to our customers. We maintain a complete laboratory facility to assist customers in solving their most difficult metal finishing problems. Du-Lite Corporation sells to American and foreign manufacturers along with many distribution centers.

Company Principals:

Walter J Smith, Owner and business professional with over 40 years' experience in metal finishing business management, sales and marketing. Patrick Smith, Business professional with 20 years experience in business management, and customer service.

Key Products:

Du-Lite Corporation's Oxiblak™ was originally developed to replace highly poisonous cyanide methods of "black oxide", our process does not contain cyanide, mercury or heavy metals which are detrimental to the environment or a health hazard for the operator. Du-Lite Corporation designs and builds manual and automated black oxide and manganese phosphate processing equipment, air exhausts, and waste water treatment systems. We also produce Kwikseal, a long lasting rust preventative lubricating oil, for Firearms. Kwikseal is included in our Firearm Cleaning Kits also.
